

**WESTERN CAPE COLLEGE OF NURSING  
ACCOMPANIMENT REPORT**

Example

Student Name: M. GWALA

Student number: 250000337

Programme & Year level: R171 – 1<sup>ST</sup> YEAR 2025

Date	Time e.g., 10h00 to 12h30	Placement Allocation SIMLAB	Narrative (Clinical academic activities and learning opportunities explored with students and feedback provided during clinical procedure/practice)	Signature	
				Lecturer	Student
30/04/2025	08:30 to	Blood	The student demonstrated a good understanding of the steps involved in measuring blood pressure. Followed infection control protocols and demonstrated correct cuff placement. With minimal guidance, the student was able to identify systolic and diastolic readings accurately. Continued practice will help build confidence and consistency. Student to schedule appointment during clinical placement period.	<i>[Signature]</i>	<i>M. Gwala</i>
	08:45	pressure			
05/06/2025	10:00 to	Urinalysis	The student showed interest in learning the urinalysis procedure but required significant guidance throughout. Key areas for improvement include maintaining aseptic technique, correct handling of the specimen, and accurate timing of reagent strip reading. Additional supervised practice is recommended to build confidence and ensure safe, accurate performance.	<i>[Signature]</i>	<i>M. Gwala</i>

**WESTERN CAPE COLLEGE OF NURSING  
ACCOMPANIMENT REPORT**

Example

Student Name: E. JENTILE

Student number: 250000328

Programme & Year level: R171 – 1<sup>ST</sup> YEAR 2025

Date	Time e.g., 10h00 to 12h30	Placement Allocation SIMLAB	Narrative (Clinical academic activities and learning opportunities explored with students and feedback provided during clinical procedure/practice)	Signature	
				Lecturer	Student
30/04/2025	08:45 to	Blood	The student performed the blood pressure measurement skill confidently and with competence. Adhered to all infection control measures, explained the procedure clearly, and demonstrated accuracy in both technique and recording of results. No assistance was required.		EJentile
	09:00	pressure			
05/06/2025	10:15 to	Urinalysis	The student demonstrated a sound understanding of the urinalysis procedure. Prepared the equipment correctly, adhered to infection control protocols, and interpreted most results accurately. Minor guidance was needed for proper timing when reading the reagent strip. With continued practice, the student is likely to develop greater accuracy and confidence.		EJentile

Student Name: T. MMEKWA

Student number: 250000313

Programme & Year level: R171 – 1<sup>ST</sup> YEAR 2025

Date	Time e.g., 10h00 to 12h30	Placement Allocation SIMLAB	Narrative (Clinical academic activities and learning opportunities explored with students and feedback provided during clinical procedure/practice)	Signature	
				Lecturer	Student
30/04/2025	09:00 to	Blood	The student attempted the skill with enthusiasm but required frequent prompting to complete the procedure correctly. Key areas needing improvement include correct cuff placement and accurately identifying Korotkoff sounds. Additional practice and supervision is recommended to enhance proficiency and confidence. Student to schedule appointment during clinical placement period for additional practice.	<i>[Signature]</i>	<i>T. Mmekwa</i>
	09:30	pressure			
05/06/2025	11:00 to	Urinalysis	The student performed the urinalysis procedure confidently and independently. All steps were completed accurately, including specimen handling, adherence to infection prevention protocols, and timely interpretation of results. The student displayed excellent technique and understanding of the clinical significance of the findings. Competent.	<i>[Signature]</i>	<i>T. Mmekwa</i>
